Safe Drinking Water Hotline National Toll-Free No.: (800) 426-4791 or (877) EPAWATER

Safe Drinking Water Hotline Monthly Report September 2001

I. Monthly Summary of Calls and Emails

Total number of calls answered:	1,530
Average wait time:	19 seconds
Percent of all calls answered in < 1 min:	91.20%
Percent of calls satisfied immediately:	98.4%
Percent of callbacks answered in 5 days:	100%
Total number of emails received:	385
Percent of emails answered in 5 days:	100%
Phone System Message Retrievals:	
- Local Drinking Water Quality	1180
- Arsenic Rule	68

II. Comparison to Previous Year

	Calls	Emails
Sep 2001	1,530	385
Sep 2000	2,653	370

III. Hot Topics

Торіс	Questions (via phone & email)	Percent of Total
Local Drinking Water Quality	192	8

V. Selected Questions and Answers

A. Microbial/Disinfectant and Disinfection Byproduct Rules (M/DBPR)

When does a large PWS have to be in compliance with the DBP rule for THM which becomes effective on January 1, 2002?

According to Tom Grubb in EPA 's OGWDW Standards and Risk Reduction Branch, 40 CFR §141.133(b)(1)(i) states that a PWS will have to be in compliance with the new TTHM MCLs after four quarters of testing using a running annual average.

If during the first year any one-quarter will cause the annual running average to exceed the MCL, then the PWSS is out of compliance during that quarter (40 CFR 141.133(a)(3)).

B. Unregulated Contaminant Monitoring Rule (UCMR) List 1:

We are a PWS that has been conducting List 1 monitoring of perchlorate. The result of a sample sent to a laboratory was reported as <40: g/L. Matrix interference in the analysis prevented the result from being more specific. Since the detected range is above but could potentially be below the minimum reporting level of 4 : g/L, should a new sample be taken and if so, what is the protocol?

According to Dan Hautman of EPA's Technical Support Center (TSC), if there is still holding time left for the sample, they can run the test again with pretreatment to reduce matrix effects. Otherwise they must resample. Laboratories should investigate pretreatment to address matrix interference. Additional concern could be the use of a dilution factor that is too large in analyzing perchlorate (diluting sample at 10:1 as opposed to 4:1).

C. and D. Underground Injection Control (UIC)

What is the meaning of USDW within the context of the UIC program?

The definition for Underground Source of Drinking Water (USDW) is codified in 40 CFR §146.3. "Underground source of drinking water (USDW) means an aquifer or its portion: Which supplies any public water system; or which contains a sufficient quantity of ground water to supply a public water system; and currently supplies drinking water for human consumption; or contains fewer than 10,000 mg/L total dissolved solids; and Which is not an exempted aquifer."

What is an exempted aquifer?

An aquifer or a portion thereof which meets the criteria for an "underground source of drinking water" in §146.3 may be determined under 40 CFR §144.8 to be an "exempted aquifer" if it meets the following criteria:

- It does not currently serve as a source of drinking water; and
- It cannot now and will not in the future serve as a source of drinking water because:
 - it is mineral, hydrocarbon, or geothermal energy producing, or can be demonstrated by a permit applicant as part of a permit application for a Class II or III operation to contain minerals or hydrocarbons that considering their quantity and location are expected to be commercially producible.
 - it is situated at a depth or location which makes recovery of water for drinking water purposes economically or technologically impractical;
 - it is so contaminated that it would be economically or technologically impractical to render that water fit for human consumption; or
 - it is located over a Class III well mining area subject to subsidence or catastrophic collapse; or
- The total dissolved solids content of the ground water is more than 3,000 and less than 10,000 mg/L and it is not reasonably expected to supply a public water system (40 CFR §146.4).
- E. Sole Source Aquifer

How many designated Sole Source Aquifers are there in the United States?

As of September 2001, there are 72 designated Sole Source Aquifers nationwide.

VI. Specific Water System Enforcement Issues

N/A

VII. Corrections (from previous reports)

N/A

VIII. Question of the Month

A citizen emailed the Hotline with the following dilemma:

"We have an occasional vacation cabin in Southern Indiana that uses a cistern for collection of water from the roof. (The water runs through an underground gravel filter, which has not been opened for several years.) We use the cistern water for plumbing, bathing, washing dishes, etc. Two issues have recently occurred:

- 1. A flashlight containing batteries was dropped into the cistern.
- 2. The flashlight was dropped into the water while observing a couple dozen foot-long snakes swimming in the cistern water.

My questions are: 1. Are there any options besides pumping all of the water out of the cistern and eliminating the snakes? Currently, we have not been chlorinating the water, and wonder if a couple of gallons of bleach will kill the snakes. If so, will the dead snakes create a health hazard for our drinking water? There is about 3 feet of water in the cistern now, and the diameter is about 8 feet. 2. Will the batteries in the flashlight decompose and create a health hazard to the water?"

The citizen was referred to his local health department and the American Ground Water Trust for information on how to correct his problem. In the meantime, he was instructed to find an alternative source of drinking water.

IX. OGWDW Calendar of Events and Meetings

November 2201	11/5-7 ECOS 2001 Natn'l. Environmental Performance Summit - Crystal City, VA 11/ 8-9 Full NDWAC Council meeting Washington DC	 11/6 EPA rescheduled public meeting on Draft Strategy for Waterborne Microbial Disease - Arlington, Virginia 11/6-7 Synthetic Organic Chemical Manufacturers Assoc. Symposium on Pollution Prevention and Environmental Regulations - Columbus, Ohio 	11/9-13 APHA, 130 th Annual Meeting - Philadelphia, PA 11/ 8-9 Full NDWAC Council meeting - D.C. 11/11-15, 2001 WQTC Meeting, Nashville, TN	11/12-14 National Pollution Prevention Roundtable Fall Conference - Charleston, SC	11/14-16 Groundwater Foundation - Annual Fall Conference, Pittsburgh, PA 11/28-30 EPA's 4 th Annual Customer Service Conference - Washington, D.C. 11/ 28-29, 2001 NDWA C Research Working Group+Future Scenarios Workshop - D.C.
December 2001	 12/5-7 ECOS 2001 Grants Performance Summit - Wyndham City Center, D.C. 12/3-6 EPA National Environmental Justice Advisory Council Meeting Seattle, WA 	12/7-9 Natn'l. Ground Water Assoc., Natn'l. Convention & Exhibition - Nashville, TN	12/10-13 EPA Region III's Chemical Emergency Preparedness & Prevention Conference and EPA HQ HAZMAT Spills Conference - Baltimore, MD		
January 2002				1/22-23 GWPC UIC Meeting - Houston, TX	
February 2002		2/18-20 ASCE/AWRA/EPA and others - Conference on Stormwater and Urban Water Systems Modeling -Toronto, Canada			2/23-27 EPA Watershed Conference 2002- Ft. Lauderdale, FL
March 2002	3/5-9 WQA 28 th Annual Convention & Exhibition, New Orleans, LA	3/8-12 Natn'l League of Cities - Congressional City Conference - D.C.	3/10-13 ASWIPCA Mid- Year Meeting, Alexandria, VA 3/10-13	3/19 Groundwater Foundation Children's Festival - Grand Island, NE	3/27-3/30 NSTA Natn'l. Science Teachers Assoc. Natn'l. Convention - San Diego, CA

Fy 2002 Conference Calendar

April 2002	4/1-5, 2002 Spring National P2 Roundtable -	4/7-9 GWPC Annual Policy Meeting - Alexandria,	AAPG Annual MtgHouston, TX 3/12-15 USGS/EPA Conference on SWP in Fractured -Aquifer Settings - Denver, CO 4/22 Earth Day-32nd Annual Observance		
May 2002	Portland, OR 5/5-11 National Drinking Water Week	VA	Observance	5/21-23 National Water Quality Monitoring Council Natn'l. Meeting - Madison, WI	
June 2002		6/16-20, 2002 AWWA Annual Conference & Exposition - New Orleans, LA		6/24-28 Community Involvement Conference - Portland, OR	 6/23-28 26th Annual Association of State Floodplain Managers Conference Phoenix, AZ, 6/30-7/3 NEHA Annual Education Conference- Minneapolis, MN
July 2002	7/13-16 Natn'l. Governors Assoc. Annual Meeting - Boise, ID	7/10-13 NACCHO Annual Meeting New Orleans, LA			
August 2002	8/11-13 ASWIPCA Annual Meeting, Richmond, VA				
September 2002					9/29-10/2 ICMA Annual Conference Philadelphia, PA
October 2002	10/6-8 ECOS Annual Meeting - San Antonio, TX	10/6-9 NRWA Annual Management & Technical Conference & Technology Exhibit Center, Spokane, WA			10/27-30 AMWA Annual Conference - San Juan, PR 10/27-30 Geological

		Society of Amer. Denver, CO
		,

November 2002	11/4-7 AWRA Annual Conference - Philadelphia, PA	11/9-13 American Public Health Assoc. 130 th Annual Meeting Philadelphia, PA 11/11-13, Council Of Infrastructure Financing Authorities Louisville, KY		
December 2002	12/3-7 Natn'l League of Cities - Congress of Cities Conference - D.C.			

- Conference Dates not yet available:
 6th National Tribal Conference in Environmental Management in 2002
 GWPC Annual Forum (last week in September?)
 Spring CIFA Legislative meeting in May

Appendix C – Safe Drinking Water Regulations Federal Register Abstracts

Public Notification (PN) and Consumer Confidence Report (CCR) Rules

"National Primary Drinking Water Regulations: Minor Revision to Public Notification Rule and Consumer Confidence Report Rule; Proposed Rule" (66 FR 46928, September 7, 2001)

This action proposed to make specific changes to the health effects language for di(2ethylhexyl)adipate (DEHA) and di(2-ethylhexyl)pthalate (DEHP) in the Public Notification Rule and the Consumer Confidence Reporting Rule. EPA also clarified proper use of the Integrated Risk Information System (IRIS) database.

Unregulated Contaminant Monitoring Rule (UCMR)

"Unregulated Contaminant Monitoring Regulations for Public Water Systems; Amendment to the List 2 Rule and Partial Delay of Reporting of Monitoring Results" (66 FR 46221, September 4, 2001)

EPA took direct final action to correct an omission in January 11,2001, List 2 UCMR concerning laboratory certification. This correction will automatically approve laboratories of public water systems, that are certified to conduct compliance monitoring using Method 515.33 to also use Method 515.4 for UCMR analyses. Additionally, EPA is delaying requirements for the electronic reporting of unregulated contaminant monitoring results until its electronic reporting system is ready to accept data. This rule is effective on November 5, 2001 unless EPA receives adverse comment by October 4, 2001.

Appendix E – Contract Management Information

Pending and Completed Actions

- A. Hotline took registrations for training sessions in Regions 1, 4, 5, 7, and 10.
 During September, Hotline took registrations for trainings conducted in Regions 2 and 6.
- B. Hotline worked with other contractors to coordinate and expedite the meeting registrations for the training sessions.
- C. Hotline worked with Project Officer in developing OGWDW's Counter-terrorism position. The Hotline provided weekly tabulations of calls concerning terrorism and continues to assess callers concerns and issues surrounding this topic for PO.
- D. Hotline received 26 phone and 7 email inquiries regarding terrorism.

Report on Internet Activities

Our searches revealed no errors on the OGWDW Web site in September.

Hotline Operational Issues (operational changes, difficulties encountered, remedial actions taken or needed, or personnel changes)

C. Hotline staff continued to work with PO in efforts to correct a problem related to direct email inquiries sent to hotline-sdwa@epa.gov, and worked with OGWDW staff to appropriately route direct email inquiries to Hotline for efficient, timely response. This routing problem was corrected on September 5, 2001, when the Hotline experienced a surge of 438 emails, some of which were duplicates. All emails were answered within 5 working days of receipt by the Hotline.

Hotline Suggestions (for areas of frequent concern among callers that EPA may wish to consider addressing in future publications)

A. The Hotline has been receiving frequent calls concerning emergency disinfection of drinking water. Currently, the Hotline is directing callers to the Educational Resource Information Center (ERIC) and National Technical Information Service (NTIS) for the EPA Fact Sheet on Emergency Disinfection of Drinking Water (EPA 810-F-93-002). The Hotline believes that making this publication available from Water Resource Center would greatly expedite these requests from concerned citizens. The document is available on the web, but many callers do not have internet access.
